

ARBAAZ SHAIKH

Java Full Stack Developer | GenAI Engineer

Pune, India | Phone: 9112887668 | Email: arbaazshaikh8757@gmail.com | LinkedIn: [linkedin.com/in/arbaaz-shaikh](https://www.linkedin.com/in/arbaaz-shaikh) | GitHub: github.com/arbaaz65dac

SUMMARY

Java Full Stack Developer and aspiring GenAI Engineer with hands-on experience building secure, modular applications using Java, Spring Boot, Spring Security, REST APIs, React.js, MySQL and MongoDB. Strong in OOP, DSA, MVC/layered architecture, JPA/Hibernate, JWT/RBAC and API design. Hands-on learning and implementation across Python, Machine Learning, LLM applications, RAG, AI agents, multi-agent workflows and tool calling, with a focus on integrating AI capabilities into practical software systems.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C#, C++, SQL

Backend: Spring Boot, Spring Security, Hibernate, JPA, REST APIs, MVC, Layered Architecture, Microservices Basics

Frontend: React.js, HTML5, CSS3, Axios

Databases: MySQL, MongoDB

Security: JWT, BCrypt, Role-Based Access Control (RBAC)

GenAI / LLM: LLMs, Prompt Engineering, RAG, AI Agents, Multi-Agent Workflows, Tool Calling, LangChain, LangGraph

Machine Learning: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Supervised Learning, Regression, Classification, Clustering, Model Evaluation, Streamlit

Tools / Practices: Git, GitHub, Postman, Maven, Agile, API Testing, CI/CD Fundamentals, Docker Exposure

TECHNICAL EXPERIENCE

Software Developer | Project-Based

2024 – 2025

- Developed backend applications using Java and Spring Boot, implementing modular RESTful services for full-stack applications.
- Designed, tested and validated REST APIs using Postman and integrated MySQL/MongoDB for application persistence.
- Applied OOP, DSA and Controller-Service-Repository architecture to build maintainable, secure and modular applications.
- Implemented JWT authentication, BCrypt password hashing and role-based authorization in full-stack applications.

PROJECTS

E-Commerce System with Dynamic Pricing | Java Full Stack | Spring Boot, React.js, MySQL [GitHub](#)

- Built 22+ REST API operations covering authentication, product/category management, cart, orders, addresses, delivery slots, transactions and product images.
- Implemented a demand-driven dynamic pricing engine and secured APIs using Spring Security, JWT and role-based authorization.
- Integrated MySQL with JPA/Hibernate using DTOs, Controller-Service-Repository layers and centralized exception handling.

Heart Disease Prediction | Machine Learning | Python, Pandas, NumPy, Scikit-learn, Streamlit [GitHub](#)

- Built an end-to-end ML workflow covering data preprocessing, EDA, supervised and unsupervised learning, model evaluation and prediction.
- Worked with classification and clustering techniques and built a Streamlit interface for model-based predictions.

GenAI / AI Learning Journey | Python, LLMs, RAG, Agents [GitHub](#)

- Hands-on upskilling in Python, LLM concepts, Retrieval-Augmented Generation (RAG), AI agents, multi-agent workflows and tool calling.
- Maintains practical learning work and experiments in a public GitHub repository covering Python, mathematics and Machine Learning.

EDUCATION

PG-Diploma in Advanced Computing (PG-DAC) | CDAC ACTS, Pune

02/2025 – 08/2025

B.E. Mechanical Engineering | DYPIEMR, Pune

08/2020 – 04/2024
